

Oct 13,2020 - Oct 20,2020	Report
Recap	• First in-person team meeting • Goal 1: Display an image using Raspberry Pi connected to Arduino board
Achievements	• Installed Raspberry Pi OS - Raspbian - Password: 123456 • Powered the display screen - using micro USB • Powered the Raspberry Pi - using USB C Plug • Connected Raspberry Pi to display screen • Measured max display image size - 14 cm x 14 cm • Measured max holographic environment size - Base: 2 cm - Height: 7 cm - Top: 12 cm • Internet connection to Raspberry Pi • Successful file transfer to Raspberry Pi - Using Filezilla
Problems Encountered	• Creating holographic images to display to screen • Building the holographic environment • Setting communication between Arduino and Raspberry Pi
Future Plans	• Prepare for Ethics Presentation • Secure connection between Aduino, Raspberry Pi, and display screen • Finish holographic environment • Design an example holographic image to display • Complete the first goal of project milestone • Team discussion about next goal of project
